Important Information

Dark colours and gloss finishes are not recommended for high wear applications such as busy kitchen countertops. These colours or finishes will show scratching more readily than lighter colours or lower gloss surfaces and require higher care and maintenance. Copies of the Formica Care and Maintenance Flyer are available from formica.com.au

Formica Metals are designed for interior vertical use only. They are not recommended for high humidity environments or for applications where frequent exposure to water is likely to occur. Some Formica Metals have a specific 'up and down' direction indicated on polycoat which must be observed when butting adjoining panels.

- Formica Metals and high gloss laminates show greater colour variation from batch to batch than normal laminates. Where colour consistency between sheets is important, sheets must be checked prior to fabrication. Actual product colour may vary slightly from sample chips.

Plant Stock is held for 40 commercial colours in 3600 x 1800mm Standard Particleboard in 18mm and 25mm thickness.

- New Stainless Steel board comes with a Dawn Grey back. Silver Shadow board comes with a Dawn Grey back. White Silver board comes with a Trade Essential White back.

HPL colours only are not available as a decorated board option.

Formica Laminates in patterns and woodgrains (Velour finish only) can be postformed to a 7mm radius in the machine direction. All solid colours are still recommended to be postformed to a minimum of 10mm for internal and external curves.

Next Delivery - ex State Distribution Centres

Legend

VL	Velour
GP	GlossPlus™ laminate
